Not pictured: Marie Rudden, MD (Riggs Affiliate Faculty)
The Austen Riggs Center is a vital therapeutic community, open psychiatric hospital, and institute for education and research. Our mission is to promote resilience and self-direction in those with complex psychiatric problems—to help people take charge of their lives. Our work is grounded in the conviction that an individual’s problems are inherently meaningful, that such problems are best understood in a social context, and that treatment leads to a more fulfilling life when the sources of suffering are addressed.

4 Reasons to Consider Riggs

1. **Advocacy and Leadership** in the fight for mental health parity

2. **Expertise** working with complex, “treatment-resistant” patients

3. **Open Setting** in which trust and relationships are central

4. **Individualized Treatment** and fully-integrated team approach

Admissions: 800.517.4447
